

Princes Does Not Dampen Enthusiasm of Crowds To See the Royal Party

Prices Go to the Grizzles

Caddies Hold Umbrellas While Royal Players Make Shots

Even the Prince of Wales has his troubles securing his golf clubs. Today at Mayfair Golf and Country club, when the two princes arrived for their game, they were unable to find their clubs, which had been lost.

On their way to the clubhouse, they were met by a caddy who said they were not there. The prince then went to the clubhouse and found the clubs in a room.

Three Ball Game
The Prince of Wales had on blue, light green shirt, grey slacks and white and red shoes. He was an old white ball, evidently a favorite of his. He had just finished a round of 18 holes, including an old "bunker" in his bag. Prince George had on a light blue shirt, white slacks, and a white and red hat. He was a new ball.

Prince W. L. Long
Major Lee was the first player off the tee. He hit the ball very far and he got a slight cut to it. He took a practice swing, rubbed the club on his shirt, and then he approved himself. He looked down the course, and he saw a caddy who was carrying a bag of clubs. He saw a caddy who was carrying a bag of clubs.

Picks His Own Caddy
There was much conversation in the caddy ranks. Two of the best caddies were selected. One was a caddy who was carrying a bag of clubs. He was a caddy who was carrying a bag of clubs.

PRINCE OF WALES IS A GUEST AT ALBERTA

Country Bulletin

VOL. LXX, No. 51. EDMONTON, ALBERTA—SATURDAY, AUGUST 13, 1927

Great Cheques Soled in Country are Cashed Here

PRINCE GEORGE UNVEILS TABLET AT CEREMONY

Rousing Welcome Extended The Royal Visitors Today

Though official duties kept him from spending a great deal of time on his Alberta ranch, and though on this account he did not feel justified in calling himself an experienced agriculturist, nevertheless his heart was in this province and from London

Prince George made a trip to the province to see the country and to see the people. He was a prince who was a prince.

'Amps' Will Have Two Princes Guests at Their Play Tonight

Responding to an invitation to attend the performance of "Lady Windermere's Fan" at the Lyric theatre, H.R.H. the Prince of Wales has expressed the intention of coming to the theatre some time during the performance tonight. He will be accompanied by Prince George and members of his suite.

The invitation was tendered by the Amputation association, under whose auspices the play is being produced, and with ready sympathy the Prince and his brother both expressed their intention of being present when they heard that it was for the benefit of the amputee service men. Local town, expert and other members of the amputation society is being tendered the Prince at Government House will also be members of the theatre party.

The Prince of Wales is a prince who is a prince. He is a prince who is a prince.

Princes Delight Crowds

Large North, Alberta Crowd Greet Visitors With Lusty Cheers

Clouded skies and a slight rain which started as the Prince of Wales and his brother, Prince George, stepped from their special at the C.P.R. depot this morning failed to dampen the enthusiasm of the typical Northern Alberta crowd which turned out to greet the royal visitors.

On-the-Bay President Has Changed Views

WINNIPEG, Aug. 13.—Absolute agreement with the decision to attack from Port Nelson to Churchill as the terminus of the Hudson Bay railway was expressed today by Brigadier-General R. W. Patterson, president of the On-the-Bay Association, who returned with the party accompanying Hon. C. A. Manning, minister of railways, on their trip to the port.

"We have always been under the impression," Mr. Patterson said, "that Churchill, although a good harbor, was very small and difficult to enlarge. I believe that the many advantages accruing to Churchill will be very far towards offsetting the disadvantages of the larger rail head."

Addressed to the executive committee of the On-the-Bay Association, Patterson said that the On-the-Bay Association had been very much interested in the matter of the railway, and that the many advantages accruing to Churchill will be very far towards offsetting the disadvantages of the larger rail head.

IN THE WORLD OF MUSIC

EMANCIPATION IS SOUGHT BY OPERA WRITER

Vittorio Giletti, opera writer, Malabar, has produced the first libretto in the world, in the form of a play, "The Emancipation of the Negro," which is now being produced at the Metropolitan Opera House, New York. The libretto is a dramatic work, and is the first of its kind. It is a story of the struggle for freedom of the negro people, and is a powerful and moving work. The libretto is a dramatic work, and is the first of its kind. It is a story of the struggle for freedom of the negro people, and is a powerful and moving work.

KELVINATOR

KELVINATOR

KELVINATORS WIN UNSTINTED PRAISE WHEREVER INSTALLED

Edmonton's Most Popular Electric Refrigerator is Sold and Placed by City's Oldest Hardware Firm—Satisfied Customers Have Resulted in Greatly Increasing Demand for This Household Necessity

Have you joined the happy family of Kelvinator users. If you haven't, then these pages carry a message that will open up a vista of contentment and satisfaction that only users of Kelvinators now enjoy.

The use of Kelvinators have brought happiness into the homes wherever they have been installed. Never does a hostess need to worry about being caught unawares by the unexpected arrival of guests when she possesses a Kelvinator. Confectioneries and Restaurants all over the continent are realizing the advantages just what a saving Kelvinators make. Not only a saving added up with satisfied customers, but a real cash saving in the preservation of foods that in other days had gone to waste.

The Kelvinator Age
Today is the Kelvinator age. The price permits its being installed in every home. It pays for itself quickly, because it works every minute of every hour of every day. And the work is of a uniform satisfaction. Owners of Kelvinators do not fear the "Long Days" of summer. They know that when the hot dusty day's labor is over, they can find a safe

as the vacuum cleaner. It is to the Kelvinator.

Kelvinators keep refrigerators at a uniform cool temperature. And this is one of the strongest points that is of vital interest to every housewife. Because few persons realize there is a danger mark on the thermometer. But there is. There is a sharp dividing line of temperature below which foods stay wholesome almost indefinitely, but above which they become unsafe, even while remaining apparently good. And that safety mark is 40 degrees of temperature.

A Save of Food
According to Dominion government food experts, food kept at 40 degrees or lower is almost indestructible, but above that mark deterioration sets in with almost unbelievable rapidity. The rate of bacterial growth is 40 times greater at temperatures ranging from 50 to 60 degrees than from between 40 and 50 degrees. And Kelvinators keep your refrigerator below the dividing line for safety. That is something that cannot be too strongly improved. Particularly during these warm summer days and nights, when it is almost impossible to preserve food safely more than a day. But in Kelvinator homes there is no need for alarm. Today, tomorrow or a week hence food in a Kelvinator-protected refrigerator is safe.

Dangers Eliminated
Kelvinators have removed the drudgery of preparing meals in the depressing days of summer. Think of making tender and delicious green vegetables crisp and unspiced, and all other food, sweet and wholesome after days in the wonderful crisp air that Kelvinators provide.

Kelvinators are a guardian that protect families from the unseen dangers that constantly threaten their health. Foods from the zone of Kelvinators are wholesome. Kelvinator users are never puzzled by the question, "I wonder if

it is still good?" when they take from the refrigerator something that has been put away for several days. They know that scientifically correct temperatures which Kelvinators provide, makes a purity that cannot be questioned. To its owners a Kelvinator is truly a peace guardian.

Improved Refrigerators

From 1914 to 1925 Kelvinator continued its efforts to the manufacture of electric refrigerators. It is the refrigerators already in use and those made by other refrigerator manufacturers. But the demand came in 1925 for refrigerators that were as good as Kelvinators themselves. Due to the merging of the Kelvinator Corporation with the Leonard Refrigerator Company, who for 44 years had been the recognized world's largest producer of refrigerators, this was brought about when used the requirements of electric refrigeration.

The result is, that today one can select a Kelvinator to meet every exact need. Demand has been responsible for the large assortment of models and sizes which are available. Leonard circulation permits the moisture within the refrigerator to be condensed and drained away leaving a cold dry air in which food keeps without faint or odor. The Leonard Circulation, with its moving white porcelain lining, and its "cleanable" feature is considered the acme of refrigeration perfection in the scientific household. And its insulation and construction features make it equally adaptable to ice or electric refrigeration at any time.

A striking example of what the combination of a reputable firm handling a reputable product can accomplish is shown by the truly remarkable success of J. A. Warner, Edmonton's oldest hardware store, who had in selling Kelvinator-Nurs in his district. The firm's advertising in these pages represents only a portion of the sales made in the Edmonton district this year.

Your attention is particularly directed to the beautiful white porcelain and nickel canopy over the Coffee Urns which was specially designed and made by us.

THE GUMPS

Comrades, Comrades

By Sidney Smith

WHAT IS THIS - A CANNIBAL ISLAND? DID YOU BRING ME OUT HERE TO THROW ME TO THE LIONS -

HUSH - DON'T BRIGHTEN THE POOR INNOCENT LITTLE THINGS - THEY ARE ONLY PLAYING WITH YOU -

IF THIS IS PLAYING - I WANT SOMEONE TO COME AND TEASE ME WITH A MACHINE GUN - THOSE MOSQUITOS ARE BITING LIKE LITTLE DOGS -

IT'S FUNNY I'VE LIVED HERE ALL MY LIFE - AND MOSQUITOS HAVE NEVER BOTHERED ME - MAYBE YOU HAVE THE HIVES - BEEN EATING ANY BERRIES LATELY?

SURE THE MOSQUITOS DON'T BITE HIM - THEY'RE HIS PALS - ROSEN AND EASER TOGETHER WENT TO THE SAME SCHOOL - DIPPED IN THE SAME BED - AND THEY'VE EATEN FROM THE SAME PLATE - THEY KNOW HIM - AND HE KNOWS THEM - BUT LET A STRANGER COME INTO THE NEIGHBOOD AND THE HOME TOWNERS MAKE A COMBINED ATTACK ON HIM - A TIGER WON'T EAT A TIGER BUT WHEN AN INNOCENT LAMB WANDERS INTO THEIR LAIR HE WANTS TO GET READY TO COLLECT ON HIS ACCIDENT POLICY -

CHEVROLET

The Most Amazing Quality in Chevrolet History

QUALITY in design. Quality in construction. Quality in appearance. Quality in performance. Never before has any low-priced car possessed them to such an amazing degree—because no other low-priced car combines the progressiveness of Chevrolet and the diversified experience, the vast resources and the matchless facilities of General Motors. Mark well the study today's Chevrolet. Mark well the aristocratic beauty of its lines—the superbly executed details of its Fisher-built body. Then go for a ride. Revel in the thrilling sport when you "step on the gas." Delight

in the smooth operation—the swift sweep of the passing miles. Marvel at the way the car hugs the road, the ease with which it obeys the steering wheel, the promptness with which it responds to the brakes.

Here is quality expressed in terms that millions now can understand and enjoy. Here is quality obtainable at Low, Lower Prices, which reflect the savings of tremendous production and which demonstrate the willingness to share these savings with the public.

Here is a car of amazing quality... for everybody, everywhere.
